

ROHIT JHA D

IT Systems & Cybersecurity Analyst | Threat Detection & SecOps

Chennai, India | +91-6382074117 | rjha13b@gmail.com | linkedin.com/in/rohit-jha-d | github.com/Rohit-Jha-D

PROFESSIONAL SUMMARY

Cybersecurity Analyst and Threat Detection Specialist with hands-on experience in Security Operations Center (SOC) workflows, SIEM log analysis, and User & Entity Behavior Analytics (UEBA) at C-DAC. Skilled in network protocol packet analysis (TCP/IP, Wireshark, DNS), incident response triage, vulnerability management, MITRE ATT&CK mapping, and automated SecOps pipelines using Python, SQL, and Elasticsearch. Proven track record managing critical enterprise transactional security, access controls, and compliance monitoring at HPCL.

TECHNICAL SKILLS

- **Security Operations & SIEM:** Security Event Triage, Incident Response Lifecycle, SIEM Fundamentals (Elasticsearch/ELK, Splunk basics), Network Log Analysis, UEBA, MITRE ATT&CK Mapping
- **Network Security & Protocols:** Wireshark, TCP/IP Suite, DNS, HTTP/S, SSL/TLS, Firewall Rules, IDS/IPS Fundamentals, Port Scanning (Nmap), Packet Inspection
- **Threat Detection & Vulnerability:** Lateral Movement Detection, Anomaly Detection Algorithms, Vulnerability Assessment, Threat Hunting, Endpoint Detection & Response (EDR Basics)
- **SecOps Scripting & Databases:** Python (Log Parsing, Regex, Security Automation), SQL (Threat Querying), Bash/Shell Scripting, Linux & Windows Administration
- **Governance, Risk & Compliance (GRC):** SOC 2 Type II Controls, ISO 27001 Basics, NIST Cybersecurity Framework, Security Audit Logging, Incident Documentation, SAP ERP Security

PROFESSIONAL EXPERIENCE

Centre for Development of Advanced Computing (C-DAC)

Chennai, India | Jan 2023 – Jun 2023

Cybersecurity Analyst Intern – Threat Detection & SOC Analytics

- Architected and deployed an end-to-end UEBA threat monitoring and log parsing pipeline in Python and Elasticsearch, aggregating over 500,000+ daily network authentication logs.
- Engineered behavioral detection models using Isolation Forest and Deep Autoencoders to flag anomalous lateral movement and geographic deviations, decreasing false positive alerts by 40%.
- Enhanced threat detection recall by 25% across out-of-sample attack validation scenarios, validating detection rule signatures aligned with MITRE ATT&CK framework.
- Documented Standard Operating Procedures (SOPs), incident response triage runbooks, and detection rules for Level 1/Level 2 SOC escalation workflows.

Hindustan Petroleum Corporation Limited (HPCL)

Trichy, India | Apr 2024 – Mar 2025

Enterprise IT & Data Analyst Trainee – SecOps & Compliance (NATS Apprenticeship)

- Audited and secured enterprise data exchange pipelines across SAP ERP, CRIS, and TIBCO Spotfire, ensuring transactional data integrity and compliance with zero reconciliation security breaches.
- Monitored high-value B2B commercial accounts (INR 90+ Crore); established data access governance and automated risk alerting for suspicious transactional delays and access anomalies.
- Authored IT operational compliance reports and security event documentation across 5 regional sales territories, accelerating incident resolution cycles by 35%.
- Performed continuous audit log tracking and permission reviews across regional database environments, enforcing least-privilege access controls across internal terminal endpoints.

CYBERSECURITY & THREAT DETECTION PROJECTS

Automated Network Intrusion & Threat Hunting Pipeline | Python, Elasticsearch, Scikit-learn

- Developed a Python-based security telemetry parsing script to inspect network packets and Syslog streams, identifying brute-force attempts and suspicious port sweeps.
- Integrated machine-learning anomaly classifiers with Elasticsearch to automate real-time alert triage, mapping suspicious IP signatures against threat intelligence feeds.

Credit Card Fraud & Transactional Anomaly Detection | Python, Scikit-learn, Flask, REST API

- Constructed an unsupervised and supervised fraud classification engine on highly imbalanced financial transaction records, securing an AUC-ROC of 0.94.
- Containerized and deployed the fraud scoring model via a secure RESTful API endpoint, delivering sub-second anomaly scoring for real-time transaction screening.

EDUCATION

Bachelor of Technology (B.Tech.) in Information Technology

Aug 2019 – Jul 2023

Anna University (Gojan School of Business and Technology), Chennai | CGPA: 8.42 / 10.0

CERTIFICATIONS

- **Graduate Apprenticeship Training Completion Certificate (NATS)** – Ministry of Education, Govt. of India (HPCL Trichy)
- **Google Data Analytics Professional Certificate** – Coursera / Google (Security Log Analytics, SQL, Data Integrity, Verification)
