ROHIT JHA D

Data Analyst | Business Intelligence & SQL Specialist

Chennai, India | +91-6382074117 | rjha13b@gmail.com

linkedin.com/in/rohit-jha-d | github.com/Rohit-Jha-D | rohit-jha-d.github.io/Rohit-Jha-D/

PROFESSIONAL SUMMARY

Data Analyst & BI Specialist with a background in enterprise supply chain analytics (HPCL) and machine learning log analysis (C-DAC). Advanced practitioner in SQL (CTEs, window functions, relational schemas), Power BI (DAX, dimensional modeling), and Python data pipelines. Monitored INR 90+ Cr in commercial receivables across 450+ accounts and cut reporting turnaround by 35% through automated executive dashboards.

TECHNICAL SKILLS

- **Business Intelligence & Reporting:** Power BI (DAX, Power Query, Data Modeling), Tableau, TIBCO Spotfire, Advanced Excel (VBA, Pivot Tables, XLOOKUP), KPI Dashboards
- **SQL & Relational Databases:** SQL (PostgreSQL, MySQL), Elasticsearch (NoSQL/Search Engine), Relational Modeling
- **Data Wrangling & Scripting:** Python (Pandas, NumPy, Matplotlib, Seaborn), R, Exploratory Data Analysis (EDA), Data Cleansing, ETL Pipelines, Data Preprocessing, Data Validation
- **Data Warehousing & Schemas:** Star Schema, Snowflake Schema, Fact & Dimension Modeling, Data Normalization, Data Quality Assurance
- **Business Systems & Workflow:** SAP ERP, CRIS (Logistics & Distribution), Git, GitHub, Docker (Basics), Streamlit, JIRA, Business KPI Formulation

PROFESSIONAL EXPERIENCE

Hindustan Petroleum Corporation Limited (HPCL) — **Trichy, India | Apr 2024 – Mar 2025**

Data Analyst Trainee – MIS & Business Analytics (NATS Graduate Apprenticeship)

- Engineered automated ETL data pipelines integrating SAP ERP, TIBCO Spotfire, and CRIS datasets using Python and SQL, eliminating manual entry and maintaining 0% data discrepancy.
- Monitored INR 90+ Crore outstanding receivables across 450+ commercial accounts; conducted cohort aging analysis (DV >15 days) and prioritized high-risk collections to accelerate working-capital turnaround.
- Architected interactive Power BI & SQL executive dashboards with multi-level drill-downs and DAX measures, slashing recurring weekly/monthly reporting turnaround time by 35% for regional leadership.
- Evaluated twice-daily fuel dryout logs and throughput figures across 1,400+ stations (HPCL, BPCL, IOCL) via EDA and market share modeling, identifying supply bottlenecks and rerouting daily shipments.
- Conducted regional MIS/IPR competitive benchmarking across 5 sales territories, uncovering sales trends that steered regional CNG infrastructure and retail fuel expansion plans.

Centre for Development of Advanced Computing (C-DAC) — **Chennai, India | Jan 2023 – Jun 2023**

Machine Learning Research Intern – Deep Learning & Anomaly Modeling

- Built a Python and Elasticsearch log-parsing pipeline processing 500,000+ daily network events.
- Trained Deep Autoencoders and Isolation Forest models to detect unauthorized lateral movement and access deviations..
- Cut false positives by 40% and lifted recall by 25% through calibrated reconstruction-error thresholds, validated on out-of-sample attack scenarios.

KEY ANALYTICS PROJECTS

Vehicle-Performance-Analyzer | Python, Pandas, Scikit-learn, Flask

- Analyzed and preprocessed a 398-car fuel-economy dataset (model years 1970-22) using cylinders, displacement, horsepower, weight, acceleration, model year and origin as inputs, and checked it for missing values.
- Trained a 30-tree Random Forest Regressor on an 80/20 split with standardised features, reaching R^2 0.89 on the held-out cars.
- Saved the model and wrapped it in a Flask app where users enter the seven specs in a web form and get the predicted mpg back.

Credit Card Transaction Fraud Detection | Python, Pandas, Scikit-learn, Flask

- Validated and cleaned the merchant records, encoded the categorical flags, and explored fraud rates against declines, chargebacks and country risk. Fraud climbs above 97% once a merchant has 7 or more declines in a day.
- Split the data 70/30 with stratification to preserve the 14.6% fraud ratio, then trained and evaluated a Random Forest classifier.
- On the 923-record hold-out set it caught about 95-96% of fraudulent transactions (fraud-class precision 0.97-0.98, F1 0.96), with 5-fold cross-validated accuracy near 98.4%.

EDUCATION

Bachelor of Technology (B.Tech.) in Information Technology — **Aug 2019 – Jul 2023**

Anna University (Gojan School of Business and Technology), Chennai | CGPA: 8.42 / 10.0

CERTIFICATIONS

- **Google Data Analytics Professional Certificate –** Coursera / Google (SQL, R, Tableau, Spreadsheets, Data Cleaning, Statistical Foundations)
- **Graduate Apprenticeship Training Completion Certificate (NATS) –** Ministry of Education, Govt. of India (HPCL Trichy)
